

'We have here a masterful, comprehensive, and highly nuanced chronicle of Vamik Volkan's work that draws wisdom from private and public consultations in such august places as the US State Department, the offices of Foreign Ministries abroad, the Kremlin, classrooms in Finland, Germany, Israel, Austria, Turkey and here in the United States, among many other settings. In all these environs, he has enabled curious minds to expand in ethical, productive, and creative ways, closed minds to gradually open, and enabled bellicose enemies and allies in fractured communities to reconfigure their embedded hostilities. Henceforth, psychoanalysts, psychologically minded diplomats, historians, and other scholars will think and practice differently.'

**Maurice Apprey, PhD, DM, FIPA, Professor of Psychiatry, Dean of African American Affairs, and Associate Vice-president of Student Affairs, University of Virginia, and training and supervising psychoanalyst, Contemporary Freudian Society**

'Vamik Volkan has an extraordinary capacity to convey complex concepts resulting from psychoanalysis in a language that can be understood by everyone. He reveals the ways in which his personal story, linked to large-group conflicts in Cyprus, his international diplomatic experiences, and his long experience as a psychoanalyst, are interweaved with the development of his theoretical frameworks, which greatly contribute to the understanding of our present time. Large-group psychology should be an integral part of all university studies, as much as history and other academic science humanities.'

**Brigitte Demeure, PhD, President of the French Society of Psychohistory and former Vice-president of the A2IP (Association Internationale Interactions de la Psychanalyse)**

'Vamik Volkan provides an absorbing narrative of his unique conceptual psychoanalytic approach. His suggested interventions are based on his understanding of conflict. He addresses and suggests approaches to diffuse flashpoints of conflicts in many countries. He is a gifted writer who describes how personal incidents in his life led to his lifelong interest in the field of large-group interactions. To sum up, this is an outstanding book that will reward the reader with a clear understanding of the underlying causes of large-group conflicts.'

**Gunther Perdigao, M. D., Member of the Executive Committee, International Psychoanalytical Association (IPA) and Associate Secretary General, IPA, 2009-2013**

**VAMIK D. VOLKAN** is the author, co-author, editor, or co-editor of over fifty psychoanalytic and psychopolitical books. He is an Emeritus Professor of Psychiatry at the University of Virginia, Charlottesville; an Emeritus Training and Supervising Analyst at the Washington Psychoanalytic Institute, Washington, DC; and President Emeritus of the International Dialogue Initiative.
